

# DIE CASTING SERVICE

## DIE CASTING SERVICE

We offer a flexible pressure die casting service, from prototype to larger volumes. Pressure die casting is an effective way to produce hundreds and thousands of parts accurately.

Parts can be cast from Aluminium, Zinc and Magnesium.

We provide design advice and help to find cost effective solutions. Our customer can be found for example from automotive, electronics and medical industry, from small companies to global corporations.

Alloys we cast includes following:

- ADC 3
- ADC 6
- ADC 10
- ADC 12
- A380
- AZ91
- Zamak 3,4,5
- Other alloys

We offer additional services, such as:

- Machining
- Thread inserts
- Painting
- X-ray inspection
- Pressure tightness inspection
- CMM measuring
- Quality inspection reports

**Quality:** We cast parts following our high quality standards. Tools can be modified and maintained by us saving time and costs.

**Delivery:** Products are delivered on time from production facility or local storages.
