

# INJECTION MOLDING SERVICE

## INJECTION MOLDING SERVICE

We offer injection molding services from test series to larger series.

We can manufacture versatile molded parts, ranging from 1-component to multi component and insert moldings.

Our own machines range up to 800 tons and we have extensive network to fulfill all other needs. We mold many different types of polymers and LSR silicones.

### Materials:

- PP
- PA
- POM
- PBT
- TBE/TPV/TPU
- PE
- PET
- PC
- PMMA
- PC/ABS
- PEI
- ABS
- PEEK
- LSR silicones
- Other materials

### We offer additional services, such as :

- Laser engraving
- Pad Printing
- Silk Screen Printing
- Insert assembly
- Spray painting

**Quality:** We mold parts following our quality standard. First article inspection including measuring of parts using 3D CMM machine as well as other type of inspections can be provided. We provide other type of quality inspection reports upon request.

**Delivery:** Products are delivered on time from our production facility or local storages. We can also package product ready for selling.
